

Operating instructions Solar panel with integrated lithium battery 6V

Since the battery is dead, please make sure the battery is fully charged before first use.

How to charge:

1. Press the switch
2. Put the device under the sun (solar surface to the sun)
3. Green light flashing means the device is charging.
4. Green light always on means fully charged
(charging time is about 12-20 hours with enough sunlight).

Indicator light status description

LED	ON	Flashing	OFF
Orange LED	Output 6V	-	Stop output
Green LED	Battery fully	Charging	No charged
Red LED	Battery normal	No battery	Battery failure

When the battery voltage is lower than 2.8V, the panel stops outputting the voltage to protect the battery.

Conformity

The manufacturer hereby declares that in compliance with the essential requirements and other relevant provisions with the following European Directives has been applied to this device with CE marking:

- 2011/65/EU RoHS - Directive
- 2014/30/EU EMC - Directive
